FARM
REAL ESTATE
HISTORICAL SERIES
DATA: 1850-1970

ABSTRACT

Historical data on numbers of farms, land in farms, and average dollar value of land and buildings--by acre, farm, and total value--are covered, as well as building value, farm mortgage debt, and farm real estate taxes per \$100 value. All series are reported by State and by 48-State totals.

Data on farm numbers, land in farms, and value of land and buildings are reported, where available, decennially from 1850 to 1910, annually thereafter through 1970. Data on farm mortgage debt and farm real estate taxes, for most States, are reported annually from 1910 through 1970.

Keywords: Farm real estate, farm numbers, land in farms, farmland values, farm building values, farm mortgage debt, farm real estate taxes.

FARM REAL ESTATE HISTORICAL SERIES DATA: 1850-1970

by

Ivery D. Clifton and William D. Crowley, Jr.
Agricultural Economists, Farm Production Economics Division

This report brings together, for the first time in one volume, historical series for selected farm real estate data previously published in several different reports. All series are reported by State and by 48-State totals.

Data on numbers of farms, land in farms, and value of land and buildings are reported decennially by State, where possible, from 1850 to 1910 and annually thereafter. Data on farm mortgage debt and farm real estate taxes are reported annually, for most States, from 1910.

Researchers and others interested in analyzing land values and related data should find that this report provides a welcome alternative to compiling data from several sources.

References for updating these series are listed on page iv.
